

# DAV MX™

## DAV MX™ CircSub shows high performance when used to hole clean at a record depth of 29,896ft in a deep water DGD well.

DAV MX™ proved to be an important and versatile tool, when used to hole clean a GOM deep water well (5,344ft. water depth). The DAV MX™ was utilised at a record 29,896ft, and demonstrated its tremendous activation speeds and reliability.

### APPLICATION

Hole Cleaning/Dry Tripping:

Hole cleaned through DAV MX™ for 4 hours with 14.8ppg SOBMM @820gpm/6,200psi

DAV MX™ remained open when pulling the string out of hole.

### COMMENTS

The Standard Diverter Dart travelled at ~1,500ft per minute reaching the DAV MX™ Valve in just ~20 minutes.

## RIG & WELL INFORMATION

- Location.....Green Canyon, GOM BHA.....10-5/8" x 12-1/4" Reamer Assy

## TOOL & APPLICATION

- Activation Depth .....29,896ft Tool .....6-5/8" Reg. (5-ported)
- Dates .....June, 2015 Dart .....SDD (2.69" OD)
- Fluid .....14.8ppg SOBM Opening Flowrate .....185gpm/1,350psi
- Opening Times .....~20 minutes Opening Pressure Drop .....130psi
